AluSpray® Aerosol Bandage

Spray it on and it stays!
The Water Resistant Aerosol Bandage

Water Resistant
AluSpray contains a proprietary carrier that causes the active wound-protective formula to adhere to the skin without washing off in hot or cold water. AluSpray can be easily removed with soapy water to inspect the wound. The usual reapplication of AluSpray is daily to every three days to insure that an optimal bacterial barrier is maintained.

Essential To Wound Recovery
AluSpray Aerosol Bandage allows the wound to oxygenate (breathe), aiding wound healing. AluSpray may also be applied over ointment or salves.

First Aid
AluSpray is a must have product for equine and farm first aid kits due to frequent injuries and accidents experienced by horses and farm animals.

Safe
AluSpray may be used safely on superficial wounds for protection against bacterial contamination. AluSpray does not contain sulfa or other antibiotics, making it permissible to use on food animals.

Small Animals
AluSpray can be used for wound treatment in dogs and cats as well.

Features
- No antibiotic residues
- Fast and easy spray application
- Allows the wound to breathe
- Reduces risk of infection
- Protection without pain
- Exceptional adhesion
- Removable with soap
- Essential to all first aid kits
- Useful in both large and small animals
