

Havoc-XT

Active Ingredient: Brodifacoum

Strongest anticoagulant rodenticide available

- 2nd generation anticoagulant
- Superior single-feed rodenticide
- Death may occur within 4-5 days after a lethal dose is consumed
- Controls Norway rats, roof rats and house mice - may kill both in a single night's feeding.
- Palatable formulation - combines active with a special mixture of highly attractive bait ingredients along with patented food processing techniques.
- Configurations include blocks and pellets

Havoc-XT Bloks

Havoc-XT Bloks are weather resistant and are very low profile. Their unique shape makes it easy for rats and mice to gnaw on. The blocks contain Bitrex®, a child and non-target deterrent.

Item #116362

Pouch: 8 lb Blocks

Item #116361

Pail: 10 lb Blocks

Item #116369

Pail: 20 lb Blocks

Havoc-XT Pellets

Available in loose pellets or place packs. Place packs allow rodents to eat through the packaging - no need to open the pouch.

Item #116372
